Shows start at 8:30 p.m.

MONDAY—TUESDAY, JUNE 28 and 29

SYD CHAPMAN in

"The Man on the Box"

Shows start at 8:30 p.m.

Election returns will be flashed on screen between reels Monday.

CAPT. J. T. SHAW

Leader of The Alberta Liberal Party

A. A. McGillivray, Conservative
Leader, Addresses Meeting Here

A. A. McGillivray, K.C., leader of the Alberta conservative party, addressed a large audience in Oyen Theatre last Friday afternoon, in support of Dr. J. P. Kerr, conservative candidate for Acadia constituency. Mr. McGillivray was given a very hearty reception as was Dr. Kerr, who spoke briefly on the provincial financial situation. Dr. H. C. Swartzlander occupied the chair.

Well Drilling at Fungo Progresses

The hole at the Fungo Oil well is now down 2815 feet, and is cased to a depth of 2707. The formation in which the hole is working is considered most favorable. A considerable quantity of gas is coming up.

The Whippet

Pound for pound, the fastest thing that goes on two legs, or four. Game to the death! Such is the whippet dog, which, trained as a racer, is giving the world of sport a new thrill in gratifying its mania for speed.

Although whippet racing has become largely an amusement of the very wealthy, it originated among the poorly-paid miners and cotton mill workers of the north of England, and was brought to America by workers in the textile mills of New England.

For a thousand years or so the greyhound was the favorite dog of the English aristocracy, and coursing one of the popular amusements of the wealthy. The English workingman is as much a sport lover and as much a dog lover as is his more fortunate countryman, but the big greyhound was "too much dog" for the miner, who often had to keep himself, his family and his dog, in a single room. So the little whippet, which weighs anywhere from five to twenty-five pounds—the favored weights being seventeen to twenty-five pounds—was obtained by crossing the Italian greyhound (the same dog as the English greyhound, but smaller) with the wire-coated fox terrier. Careful breeding has resulted in a dog that has the speed of the greyhound combined with the alert aggressiveness of the terrier.

Election Next Monday

Active Campaigning by Contesting Parties Will be Concluded Saturday.

Everyone Urged to Use Franchise

Next Monday will witness another provincial election, with three cornered contests in nearly all ridings. In this constituency the contest is between Louis Proudfoot, present U.F.A. member, Dr. John P. Kerr, conservative, and George Campbell, liberal. Each of the candidates seeking election, is optimistic as to the outcome. Whatever the result, it is desirable that every one entitled to vote go to the polls and use their franchise.

Instructions to voters are published in this issue in another column. Read them carefully.

Bishop Harding, D.D. Visits Oyen

Bishop Harding, D.D., the Lord Bishop of Qu'Appelle, was in Oyen on Monday afternoon, and administered the sacred rite of the Order of Confirmation at All Saints Church. Visiting clergy were present as follows: Rev. Remington Walker of Kerrobert, Sask., Rev. W. Dacre Russell of Loversburg, Sask., and Rev. J. Bullyment of Creston.

The church was beautifully decorated with carnations and wild roses and was well filled when service commenced. Those to receive the order of confirmation were Mrs. E. C. McClean, Mrs. J. Long and Mrs. William Frizzell.

Confirmation was preceded by a short service in which the two colored windows were dedicated, one of which is to the memory of the late Mrs. F. E. Todd, placed in the church by the Women's Guild.

Bishop Harding, D.D. the visiting clergy and Mr. and Mrs. G. S. Pock, were the guests of Mr. and Mrs. Thompson at dinner; and after the service a reception was held at the Thompson home.

Lorne Proudfoot Addresses Meeting in Oyen

Lorne Proudfoot, U. F. A. candidate, addressed a meeting in Oyen Theatre last night and was given an attentive hearing by a small audience, which increased to about 100 as the address progressed.

Mr. Proudfoot spoke with pride of the five years administration of the U.F.A. government, and asked for his return as a member of that government.

Lose Home by Fire

Mr. and Mrs. J. C. Henderson of Sunnydale, had the misfortune to lose their home last Sunday afternoon, when fire destroyed the building and contents. Mr. and Mrs. Henderson had been attending church, and afterwards were having supper with friends about five miles away, when they were advised by phone that their house was on fire. Neighbors who were first at the scene were unable to do anything to stop the flames.

ART SATEENS and ART CRETONS

Our shipment of these goods just opened. The designs and values are wonderful. Just call to see them. A good range of Curtain Muslins at moderate prices.

A new lot of Ladies dresses on display.

New Era Dawning For Glass Industry

Invention of Austrian Scientists Is Considered Very Valuable

In the days of the Roman Empire an ingenious inventor is said to have invented an unbreakable glass. He took a sample of the product to the Transilvanian, expecting to become the recipient of a munificent reward. On demonstrating the validity of his claim he was immediately executed in the interests of the Roman glassmaking industry, and his secret perished with him.

Now, after the lapse of nearly sixteen centuries, some two scientists of Austria, Dr. Fritz Pollak and Dr. Kurt Rippner, of Vienna, with a new malleable glass described as non-splittable, ten times clearer than ordinary glass, and easily bent. A ball of the substance, when dropped on the floor will bounce better than a golf ball. It will absorb any kind of dye, and delicate vegetable dyes can be used to color it. It can be made into imitation mercurian pipes, clear bottles, and the like, and handles and door knobs. In many instances it can be used in place of rubber or vulcanite in the construction of automobile wheels should serious accident occur. A valuable property of this glass is that it will transmit the ultraviolet rays and therefore, can be used as a shelter for patients requiring sun treatment—also for greenhouses.

Concerning this new glass, the weekly magazine, Motor, has this to say:

Applied to motor car windows and windshields, the new material would have the transparency, whiteness and durability of glass, with a degree of flexibility that removes the danger from splinters and jagged fractures. It is an organic (non-mineral) substance. It is sufficiently hard to be safe from accidents, and is yet flexible enough to bend under stress to a marked extent without fracture. It can be broken with the bare hands without risk, because the lines of fracture are not sharp and jagged.

If all these claims are true, a new era may be dawning in the glass industry. The silicification is not yet. This is only a step but a fairly long one apparently. The possibilities seem many.

Important Part of Diet

Large Portion of Body Tissue Is Made Up of Water

It is probably safe to say that the majority of people who do not drink sufficient amount of water to meet their bodily needs.

Water is a very important part of the diet and a large amount of water should be consumed. Two quarts a day are not too much. A baby may take a pint a day.

When we consider that water makes up a large portion of the body tissue and fluids, and that it not only acts as a solvent of the food and waste material, but aids in maintaining an even body temperature we realize how necessary it is to drink water.

It is best to drink water with meals, but this is not always possible, so there must be taken with meals. There is no objection to this if care is taken to properly maintain the food and not use the water to "wash it down."

Babies should receive water between feedings and it should be given within one hour before or after feeding. Let babies drink as much pure, cold water as they like. Many adults will do well to drink more than they like—six or seven glasses per day should be the minimum—New York Evening World.

One Joke That Is Forbidden

Certain Indian Tribes Cannot Ridicule Mother-in-Law

Among certain tribes of North American Indians it is considered a breach of etiquette for a man to make fun of his mother-in-law and his consideration. He can raise the taboo if he does some especially worthless feat or at the invitation of the mother-in-law, who does so by presenting a valuable gift to the man. The Indians of these tribes may jokingly refer to himself as a fool, but they by marriage or otherwise, but it is not done in the case of mothers-in-law.

Auto Tourists Invade Alberta

The auto tourist season in Alberta is now in full swing, fully two months earlier than last year. In the first three weeks of May, the big auto camp at Calgary recorded the visit of 140 tourists. The Banff-Windermere Highway is open for traffic and is witnessing a very heavy tourist movement. The prospects at present are for the heaviest tourist season in the province's history.

Call—Hill be die with his boots on Mark—Yes on the accelerator!

Still Use Ancient Compass

Chinese Have Made No Change in Five Thousand Years

The invention of the compass is said to have taken place in the reign of the Chinese Emperor, Hoang-ti. In 268 B.C., a certain Chinaman discovered that if a narrow splinter of lodestone, or natural magnetic iron ore, found in Asia Minor, was placed upon a piece of wood and the latter allowed to float in a bowl of water, the iron would invariably point in a north and south direction. This crude device was improved by the addition of a circular wooden card on which twenty-four rays were drawn. Each one of these lines was given a name and the whole thing was called the "ignam-ohing," which is the Chinese word for compass. The south point of the circle was denoted with a distinguishing mark, in the same manner as the nations today indicate the north point of their compasses by a four-leaved clover. The Chinese compass of the present day shows to it five thousand years ago.

New Zealand's Queer Suspension Bridge

Structure Sways and Heaves in Weird Fashion

The queerest bridge in New Zealand is a suspension bridge over the Wanganui river at Kaitake. It was erected to carry traffic during the erection of another bridge, which had been started by the contractor, but the bridge under construction was wrecked in a flood, and the remnants can still be seen in the river. With the flood-swept fragments apparently there went out to sea the settlers' prospects of a new bridge. The present structure sways in weird fashion, so much so that cattle become terror-stricken when crossing it, while the occupants of any motor car, seated in the bridge, shudder singularly in front of them, may well be pardoned for wondering if their vision is to be trusted.

72 Years Married

Twenty-two years of married life is the unique matrimonial record just celebrated by Mr. and Mrs. John Williams, of Point Fortuque, Que. That time ago, John, a lad of 20, took his young bride into life partnership. The couple enjoy good health and retain their interest in the questions of the latest week of April.

A new device, consisting of four horizontal gratings, has been developed to eliminate the greatest risks of automatically diminishing the speed of a falling aeroplane.

Canadian Sheep Of High Quality

Best of Wool Produced in Dominion and Industry Is Growing

This we can grow good sheep and wool in Canada is shown by the fact that at this year's international livestock show at Chicago, and at last year's sheep show held in Canada swept the board of prizes.

Commenting on this, W. A. Dryden, one of the Canadian Co-operative Wool Growers' Association's directors, says: "This proves Canadian sheep are right, the wool is right, and our country is right."

And the suitcase and lamb from Canadian sheep is second to none in quality and flavor for food.

According to the latest available reports and estimates, there are 272,420,200 sheep in the world, and of this total Canada has 2,886,000 sheep and lambs, or less than one per cent.

The annual consumption of wool by the people of Canada is roughly 70,000,000 pounds, on a gross basis, as it comes from the back of the sheep, while the total annual production in Canada is 15,000,000 pounds, of which at least half is exported.

Col. Robert McLean, asked why Canadian sheep did so well at Chicago, replied: "I haven't a doubt but that our Canadian climate, with its earlier frosts, has much to do with it, particularly when it comes to fitting meat for export. Our lambs are very hardy and with more test and appetite, they flesh more quickly and more evenly."

Environment and History

Relation Is Shown By Some Interesting Facts

The following are some interesting facts concerning the relation of environment to history: Cold breeds energetic men. The sea breeds some men. The great sun-baked and frost-gripped island plains are the incubators of world trouble. From Central Asia barbaric hordes went west. From the hot wastes of Arabia and Northern Africa, Mohammedanism went out to devastate civilization. Bohemian originated in the central plains of Russia. Historically its chances of "capturing" a populous maritime country like Britain are nil.

Philanthropist: "Have you any plans in view after your term expires, my good fellow?"

Convict: "A few, mum. I've got up plans of four countries upon which I've private pretensions."

Mother—"Well, dear, did you have a lot of attention paid to you at the party?"

Pieces Of Arctic Pie

Dividing Up The Frigid Territory in the Polar Waters

While America, Norwegians and Poles, seeking new continents to discover, all hands may be reminded that the Soviet Government has officially put forward its "Equilibrium Pie" claim to all Arctic territory converging on the Pole north of the Canadian dominions. Canada did the same thing in the spring of 1913, immediately following, as it happens, the publication in the Transcript, for the first time, of a suggestion that territorial discord might be avoided should each country bordering on the Polar region be allowed as its territory the space falling within its own lines of longitude.

This arrangement would concede to several countries pie-shaped wedges of ice and snow having only a possible value still to be demonstrated. At least two governments appear to believe the thing practical, and of course the United States would come in on this unique but practicable division—Boston Transcript.

World's Most Indolent Animal

Slith is Indifferent To Noise Or Movement Of Any Kind

Positively the most indolent animal in the world is the sloth, so indolent that one wonders how he manages to obtain sufficient food. Quiescent by all going on around it, the sloth sleeps on; even the most violent shaking will not wake it. Nothing so trivial as the waving of a scented rag or the drag of a climbing serpent not more than a few feet off can produce even the faintest change of expression. It is totally indifferent to any noise or strong smell in its vicinity, either of which things animals in general cause a frenzy of excitement. So indolent is the sloth that even a gun fired at its ear will not produce any movement or indication that it lives.

Proves Woman Can Keep Secret

Indian Woman Will Not Tell Where Can a Woman Keep a Secret?

Can a woman keep a secret? Emily, sister of Pauline Johnson, has done so for years. She knows where she has never revealed it. But it will never, never tell. She says, "Albert Greenwood, as a boy, believed he was the greatest Indian in the world, and I was the greatest Indian. He was right, the white people will never find the burial place of Tecumseh, it is so hidden. No one but Indians would have thought of it."

Quarter Of Century's Growth

Federal Minister of Agriculture Expresses Faith and Pride In Canada

In a recent published statement, W. R. Motherwell, Canadian minister of agriculture, expressed his faith and pride in Canada as follows: "A country producing annually \$1,500,000,000 worth of merchandise agricultural products from its 700,000 farms is a country without a peer, and just such a country is Canada. Canada has a moderate and healthy climate, great farming possibilities for those in a position to take advantage of them, and inures to all who will work intelligently on her lands a comparatively sure return for their labors. During the past quarter of a century Canada has increased her output of hard spring wheat by over 1,500 per cent and she now has attained the enviable distinction of being the largest exporter of wheat in the world. The production of livestock and livestock products, such as grain, fruit, timber, products, minerals, etc., has also increased with almost relative rapidity."

International Good Will

A Canadian Girl and Girl from Montreal are to spend three weeks in the United States as guests of the Kiwanis Club of Atlantic City to "perpetuate the international spirit of good will."

Dorothy Macfield, aged nine, and Jammy Passau, aged 13, described as typical of Canadian boys and girls, were chosen to spend three weeks in the United States as guests of the Kiwanis Club of Atlantic City to "perpetuate the international spirit of good will."

Had Long Journey

Traveling by postcard, posted at Knaprother, Yorkshire, in 1916, recently reached Walter, Kent, the postcard.

The postcard was sent to the half-penny stamp affixed is a proof of its antiquity.

Creed Decreased In Sweden

Sweden averaged 10,000,000 in the years from 1870 to 1880. The list has been cut down to twenty million, according to figures just published, the country to this date.

There is no death penalty for murder in Sweden.

Albera Butter For Britain

Almost one-third of Alberta's butter production is being exported to Great Britain, the shipment to this date.

The last year aggregating about 8,000,000 pounds, according to the latest government statistics.

Canada's Experimental Farms

Have Far-reaching Effects In the Development of Canadian Agriculture

Twenty-two experimental farms and stations are now being operated by the Canadian Government department of agriculture. These farms and stations are situated in well-chosen locations in the principal agricultural districts of the Dominion and are utilized to the fullest extent for the study of the agricultural problems peculiar to the territories which they respectively serve. Their work covers all the many and diversified phases of agricultural production, experimental, investigation and demonstration. The results of their work are carried closer to the farmer in some districts by means of the system of illustration stations located at strategic points in every province, while the interests of some of the more sparsely settled and less accessible areas of the Dominion are served by experimental sub-stations, which are really experimental farms on a small scale.

The work of the experimental farms system has already far-reaching effects in the development of Canadian agriculture, and its field of usefulness is being continually expanded to cover new lines.

According to experimental work the experimental farm system is concerned with the control of fungus and other plant diseases, and laboratory have been established at various points with this end in view.

The benefit of the information gained by the farms is available to new settlers and farmers. A wide range of free service is extended to those engaged in agriculture in Canada.

Very Few Changes In English Language

Words Are Practically Same As In Shakespeare's Time

The plays of Shakespeare as they appear in works of literature are substantially as Shakespeare wrote them, having required few changes in the documents and early printed editions. Probably more punctuation marks have been introduced for the purpose of making the meaning clearer. Many words that Shakespeare used are now obsolete, just as there are now recognized as many words that were unknown in Shakespeare's time. A living language is a thing of growth like a tree. Some branches drop and new ones grow. A word that is no longer living language is a better illustration of this than the English language. Grammar grows with the language. Today the forms of many words are more permanently fixed than they were in the time of Shakespeare, but, it is, spelling has been standardized, and grammar has been more completely reduced to a system; and it is only the fashioning work that has to be done by hand.

Seemed Rather Doubtful

Home Town People Speculate About Young Author's Ability

The prophet is not the only person who is without honor among his countrymen. The writer of fiction, declares Harold MacGrath, one of the most popular of young American writers, is not long ago, his wife was doing some shopping in their home town of Syracuse. An old lady standing beside Mrs. MacGrath, had just given her name in charging several purchases.

"Is that Harold MacGrath, the author?" asked the old lady.

"Yes."

"And are you his wife?"

"Yes."

"Well, who writes his books for him?"

"He writes them himself, of course. Why?"

"Well," doubtfully replied the old lady, "it may be true, but my two boys went to school with him and they are only bookkeepers now, and they say that he is a very smart man."

"You're his companion."

"Yes."

"What is believed to be the first brain of prehistoric man known to science has been discovered in a petrified state in the hills near Montreal. It has all the parts of the human brain and its skulls of prehistoric men, according to Dr. Grignon, the holder, is estimated to be 25,000 years old."

Creed Decreased In Sweden

Sweden averaged 10,000,000 in the years from 1870 to 1880. The list has been cut down to twenty million, according to figures just published, the country to this date.

There is no death penalty for murder in Sweden.

Albera Butter For Britain

Almost one-third of Alberta's butter production is being exported to Great Britain, the shipment to this date.

The last year aggregating about 8,000,000 pounds, according to the latest government statistics.

Maple Syrup Time in Old Quebec

Shaking Away the Sap

Maple syrup sap is flowing now from the many forests of the first of the season's output. "Ah-h-h-h," goes the shout of the sugarer, as they dig wooden ladles into the flowing sap, raising them hastily to their lips so as not to lose even a drop. According to Dominion Express officials at Montreal, the quality of the syrup leaves little to be desired, while the quantities being received are well up to the average of former years. Most of these shipments go to produce dealers in Montreal, but quite a number are shipped to consumers who look forward every spring to this dainty sweetener from the Quebec maple forests. The sap, when the ladles are not found, former inhabitants of the province of Quebec get the maple sugar feeling every year and a considerable number of maple shipments go forward to satisfy it. While the picturesque method of siphoning the trees and gathering the

S. Janowski and B. Stanhauer, the former Polish Immigration delegate and the latter a delegate from the Polish Minister of Agriculture, are in Canada for a six-week study of farming conditions in western sections of the Dominion. They will also look into the distribution of work among the Polish colonies in Canada.

Four fishermen from the United States went fishing on the Caine River, New Brunswick, for 13 days recently, and caught 340 fish. State Senator Bradford, of Indiana, caught a 43-inch salmon weighing 27 pounds. Others in the party were Fred N. Peet, Dr. E. R. Zimmerman and D. H. Faxon. Only barbed hooks were used so that no fish were either killed or injured.

The second largest outdoor swimming pool in Canada has been opened at Lake Louise on the Terrace between the dining room of the Château and the Lake. The new pool is 100 feet long and 40 feet wide. It is surrounded by tall concrete columns between which there are gigantic sheets of plate glass, providing a wind break against cool breezes.

Approximately 120,000 live fish, fresh from American hatcheries, passed through Dominion Express Yards, Windsor Station, Montreal, recently, on their way to Beauport, Quebec. They will be used to stock private lakes in northern Quebec owned by wealthy citizens of the U.S.A., who prefer the virgin hills and forests of Canada to the densely populated summer resorts of their own country.

Norman E. Wilkinson, London, England, inventor of camouflage painting, which was used extensively during the last war, arrived in Canada on the Canadian Pacific liner "Montcalm" with his wife recently, for a tour of the Dominion. Sir Clifford Sifton, prominent Torontoan, and Sir Stephen Pearson, M.L.M.E., famous mineral geologist, also arrived on the same vessel.

As Late As September 15, 1925

CAPTAIN SHAW

"The announcement that Captain Shaw, who has represented West Calgary in the House of Commons as an Independent member for the past four years, will not be a candidate in the forthcoming election will be received with the deepest regret, not only in all parts of Alberta, but among forward-looking people throughout the Dominion.

"Capt. Shaw's withdrawal from public life would be a very serious loss to Canada. He made his mark in the last parliament, and he is recognized today as a parliamentarian of independent spirit and of outstanding ability and courage. He is one of a still small group of men in the federal sphere who have been paving the way for a real advance from the petty personal politics of today, to constructive and genuinely progressive statesmanship. His early return to public life will be hoped for by all who are familiar with his record of service in the parliament recently dissolved.

"Since the announcement of Mr. Shaw's intention not to be a candidate very great pressure has been brought to bear upon him in Calgary in the hope that he will reconsider his position. We trust that he may yet decide to allow his name to go before the electors on October 29th."

CAPT. J. T. SHAW

MARK YOUR BALLOT THROUGH
Do not be satisfied by marking No. 1 for your own party, but mark your second choice of the other two candidates.

MARKING YOUR SECOND CHOICE

In no way interferes with your first choice. Your first choice is not eliminated unless your candidate is the low man. If you mark one candidate, it means merely that you make no second choice of the other two, if your candidate should be eliminated.

Vote 1 For The Liberal Candidate

If you have determined to vote No. 1 for another candidate, then vote No. 2 for Liberal Candidate.

Advised Inserted by the Provincial Liberal Party

Buy Advertised Goods

Voters Attention!

Directions as to the use of Preferential Ballot

The preferential ballot will come into general use for the first time in the forthcoming provincial elections. Every voter should be thoroughly conversant with the method of marking the ballot before attempting to vote. Read these instructions.

The voter must not use the X mark.

The voter must place the figure 1 opposite the name of the candidate who is his first choice, the figure 2 opposite his second choice, the figure 3 opposite his third choice and so on until he has voted for all the candidates on the ballot if he so wishes.

The voter may plump for one candidate alone, using the figure 1, without spoiling his ballot, but is urged to vote to the full extent of his choice, as it is only by doing this that the voter obtains the full benefit of this form of ballot.

The voter must not place more than one choice opposite any one candidate.

The voter must not make the same choice for more than one candidate.

The voter must not make any mark on the ballot not authorized by these directions.

Read these Instructions Carefully

JOHN D. HUNT,

Clerk of the Executive Council,
Government of Alberta

Arrangements are being made for the holding of the western annual meeting in Winnipeg from November 3rd to 5th of the Canadian Institute of Mining and Metallurgy. The meetings will be held in the Royal Alexandra Hotel. Delegates from all points in the West, as well as from Eastern Canada, are expected to attend.

A memorial known as "The Altar of Peace" has recently been unveiled in Stanley Park, Vancouver, to symbolize the spirit of international good-will existing between the United States and Canada. The memorial was raised by joint subscription of United States and Canadian Kiviana Clubs, and stands on the spot where the late President Harding delivered the last speech of his life while visiting Canada, in July, 1923.

One of the largest shipments of live foxes for export ever to leave Prince Edward Island, left recently for New York for transshipment to Norway. The shipment comprised 500 foxes in all, with a gross value of \$40,000. Several small shipments of animals were consigned to Norway last year and this large order has followed the success which the Norwegian breeders have had with those animals previously sent from this country.

As illustrating the volume of grain delivered by the Port of Montreal compared with that of Vancouver, figures given by the Pacific coast port for the crop year ending July 31 last, show Montreal deliveries were six and three-quarters times those from the British Columbia coast. Vancouver shipped 25,133,215 bushels of grain for the crop year ending July 31, while Montreal, during this period, disposed of 169,920,015 bushels.

E. W. Deady, president and chairman of the Canadian Pacific Railway, accompanied by several of his directors is at present engaged in the annual tour of inspection of the company's system. In an address to the directors of the Canada National Exhibition in Toronto, Mr. Deady declared that the "only safe and certain cure for the ills of the Dominion's railway obstructions rested upon the country's industrial and agricultural development."

READ THE ADVERTISEMENTS

Fresh Natural Scenes With New Road

Beautiful Emerald Lake, now accessible. Left insert—pointing out wonders on Lake McArthur. Right insert—Staircase Canyon, Banff-Windermere Highway.

There is a fresh unfolding of the wonders of nature in the new scenic area opened up by the Lake Louise-Feld Highway through the mountains. The glories of the Yoho National Park in British Columbia, the Yoho Valley and Emerald Lake are now accessible to the motor world. This latest achievement is the completion of a motor highway across the famous Kicking Horse Pass in the central Rockies.

From Lake Louise, the gem of the Rockies, the road proceeds west through avenues of pine and fir up to the Great Divide at Stephen. It may grade the motorist's vision down to Lake Wapta, the centre of a romantic and picturesque region. The descent continues through the Kicking Horse Pass to the Yoho Valley. Here, in British Columbia, a part of the abandoned right of way is used and some of the finest scenery in the world is unveiled. There is a marvellous view in its glittering glacier.

Winding down the side of Mt. Stephen, the traveller comes to the flat and Kicking Horse River, between Mount Stephen and Mount Field. On the face of Mt. Stephen can be seen, a few hundred feet above the opening to the silvered mine, which is reached from the flats, by a winding trail. This mine, opened in 1935, is unique in its operation and in its situation on the side of a grim mountain. It is worth the effort of a trip up the incline and offers fine opportunity for the amateur climber.

Driving along the river flats, the trainee can be seen, many feet above, winding their way along the side of Cathedral mountain. Down the river valley, the new road connects with the existing motor road which reaches eight miles up the Yoho Valley to Takakkaw Falls. The euphonious Indian name, meaning, "It is wonderful," well describes the beauty of the ribbon of water, with a fall of 200 feet, in clouds of foam. Another branching, tree-lined avenue leads to Emerald Lake, a distance of seven miles. This lake, of exquisite coloring, lies placid under the protection of Mount Wapta, Burgess and President, and affords fine fishing.

At Field, the natural bridge in the line of the points of interest is under construction from this junction to the western boundary of Yoho park. Thus it will be linked up with a highway now being built from Golden.

These roads will give the motorist a scenic loop, probably without parallel in the world, which will include the finest scenery in the Rockies. From the prairies, by way of Banff and Lake Louise, down to Field and Golden, the road turns south by way of the Columbia, to Windermere valley. Through the western gateway to the Banff-Windermere road, the return to Banff and on to the Prairies, is made.

The Banff-Windermere highway is already connected on the west, by the Columbia River road, with the 4000 loop, known as the Grand Circle tour, which stretches down the Pacific coast to southern California and returns by way of Arizona, Utah, Wyoming and Montana. The whole highway touches, throughout its length, ten national parks in the United States and Canada. The beauties of the Canadian section, so recently opened to the world, are rich in promise for the motorist.

WORLD HAPPENINGS
BRIEFLY TOLD

Revenue of Temperance Council of Christian Churches in England and Wales is subject to taxation under a decision rendered by the King's Bench division.

A world survey showing that about 26,000 persons were killed and \$60,000 injured in automobile accidents last year, is made public by the American Road Building Association.

The woman of today wears fewer clothes on the street than her grand mother wore 50 years ago, says Senator Norris, of Nebraska, during a discussion in the senate.

M. Bronsky, a member of the finance ministry, says that as an outgrowth of extraordinary measures taken by the Soviet Government, the chevron, the new Russian gold unit of value, has now been definitely stabilized.

General strikes which would involve the violation of wages could be more easily controlled by the government, as was pointed out by William Green, president of the American Federation of Labor, in an address before the convention of the Rotary International at Denver.

The British Trades Union Council, through its acting secretary, Walter S. Clifton, denied that the British Government has sent funds to British strikers, and brands reports of such renunciation as misrepresentations threatening to "endanger relations between Great Britain and the Soviet."

Citizens Of Victoria

Most Heavily Taxed

Statistics Show All Western Cities

Bearing Highest Tax Burden

With a per capita tax of \$122.25, Victoria, B.C., is the most heavily taxed city in the Dominion, while Charlottetown, P.E.I., with a tax per head of \$53.50 occupies the enviable position of being at the bottom of the list of 17 cities, according to statistics issued by the Canadian Research Institute.

Montreal, the largest city in Canada, has a comparatively low tax burden with \$84.45 per capita, Toronto is eighth in the list of 17, with a per capita assessment of \$104.69. Vancouver is ranked at the rate of \$120 per head.

The western cities are bearing the highest tax burden, it is stated in the report.

The data from which the statistics were compiled were based on municipal, provincial and federal taxation figures. The report of the Institute states that per capita taxes are not an infallible guide in judging the efficiency or inefficiency of various governments, and that their main value is the indication of the trend of costs, problems in different municipalities, and, naturally, also costs of solving problems arising.

Tailless Flyer Is Latest Invention

Impossible For It To Get Out Of Control

A description of an aeroplane which will not, through any error on the part of the pilot, get out of control in the air has been given before the Royal Aeronautical Society at the Royal Society of Arts, John Street, W.C., England, by the inventor, Capt. G. T. H. Hill, a British air pilot.

The machine is a tailless structure with a swept-back biplane wing, has air-brakes which streamline its glide and enable it to alight in a small area, and will fly steadily even when the pilot has let go all the controls.

Smaller Engines Coming

Will Reduce Production Cost of Trucks and Pleasure Cars

Smaller engines, normally strong enough to run a motor car only on a level, but reinforced by a supercharger powerful enough to take it up the steepest hill, will soon be used generally on automobiles, according to G. E. Hart, of General Motors. Such engines, he says, have been used successfully on aeroplanes and racing automobiles, and should be practicable in reducing the production of trucks and pleasure cars.—Popular Science Monthly.

France Holds Different View

France reiterated her contention that land, naval and air armaments cannot be treated as a single unit in an effort to bring about any degree of disarmament. This view, on the whole, differs from the British and United States thesis that they can be studied separately.

Pullman Porter.—Brush 'ya' off, son!

Old Gent.—No, I'll get off in the usual way.

W. N. U. 1234

More Land Buyers From U. S.

Canadian National Railways Bring In Settlers Of Desirable Type

Twenty-two prospective land buyers and home seekers from Omaha, Nebraska, arrived in Winnipeg recently en route to Eston, Sask. These men are all successful farmers and stock raisers and the total combined capital which they are prepared to invest in Western Canada, if conditions are to their liking, represents a very considerable sum. The party is one of a number which have been and will be brought to Canada by the Canadian National Railways colonization and land settlement department during the year, and they represent the type of agriculturalist who has had long experience under conditions similar to those obtaining in the section where they contemplate settling and who, in addition, has sufficient capital to commence farming of an intensive character.

At the present time the National system is the only organization seeking to attract this desirable type of settler from the United States by means of personally conducted tours which permit the prospective buyer to see for himself what the country has to offer. The success of the plan is evident from the fact that of the last party of 24 farmers to Eston last month, seventy-five per cent. have already purchased land in that territory and have either moved there with their families and equipment or are preparing to do so.

For the present efforts are being concentrated largely upon Central Saskatchewan, where conditions resemble more closely those with which these United States farmers have been acquainted and it is believed that before the end of the year a large number of experienced suited farmers will be settling in this territory.

More Friendly To British

People of United States Adopt Friendlier Attitude To British

A friendlier sentiment towards the British in general and Great Britain in particular has developed in the United States during the past year, Sir James Elder told a gathering of Canadian parliamentarians at Ottawa. Sir James was entertained at a private luncheon in the speaker's chambers on the occasion of his retirement from the post of Australian trade commissioner to Canada.

"Many cherished a sentiment not altogether favorable to the empire when first came to the States," said Sir James. "Now Britain and the Dominion stands in a much more favorable light in that country." He believed this sentiment was the result of the signing of the British debt, the crowning of the Irish Free State and the help which Britain has given in the re-arming of Canada.

Sir James reiterated his opinion, often expressed before, that the appointment of Australian trade commissioner to Canada would greatly benefit both dominions.

Will Make Aeroplane Noiseless

French Guarding Secret Of Silent Propeller Just Invented

French military authorities are guarding with the closest secrecy the new invention of a silent aeroplane propeller enabling noiseless night bombing raids. "If this proves successful anti-aircraft artillery will be unable to find a target at the tremendous heights reaching machines fly above the reach of the most powerful searchlights."

Hereofore anti-aircraft fire was directed by microphones detecting the sound of the propellers and actuating the range finders and directors.

The new air screw is made from a solid forging. The exact reason for its silence is not divulged, but it is believed to be due to the absence of flap blades and the keen leading edges of the propeller blades which knit-like sharpness enables them to cut the air with the least possible disturbance.

With the propeller's whir silenced, the manufacturers can muffle the motors like an automobile engine and produce a real godsend machine.

Prince Enjoyed Game

Played Golf In Pouring Rain Under Shelter Of Umbrella

Under the shelter of a big red umbrella, the Prince of Wales played golf in a pouring rain at Sandown and apparently enjoyed it. He was playing a three-ball match with his lady and a friend. At the fourteenth green it was raining harder than ever, and one of the Prince's opponents acknowledged it was good enough.

"I rather like it," replied the Prince. "Let's carry on." So they completed the round.

Living by one's wits has been recommended as an anti-fall remedy.

"IDEAL" Fashions

One-piece Frock With a Two-piece Look

Jeau Patis, in his recent showing, has relieved the type of comfortable one-piece sports clothes for which he is best known; many of them draped with plaits, but all with bodies cut straight and comfortably loose, and having the waistline around the top of the hips. This type of dress seen in the model pictures here, where the box-plaited skirt-front is joined to the body under a deep tuck. Note the back view shows a flat silhouette. There are gathered at the shoulders, and the collar is of the convertible type, to be worn high or turned back. No 1091 for misses and small women, and in 1092 for 16, 18, and 20 years, or 1093 for 24 and 26 inches bust only. Size 18 yards with bonnet material for dress as illustrated. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, is of interest to every home dressmaker. Price of the book 30 cents the copy.

Canada's Valuable New Industry

Eastern Canada's pulpwood resources are furnishing nearly a raw material for the manufacture of rayon, a commodity which is being replaced generally silk on the market, according to Dr. W. Hale Clark, who spoke to a large audience on "rayon" in Montreal under the auspices of the Canadian Chemists Convention.

Rayon is made entirely of wood pulp, the Canadian maple tree being the favorite for the purpose, said the speaker. At present nearly all the manufacturing is done in the States and Europe, though there are two factories in Canada, one of which is in Quebec.

The most modern machinery is used, and nearly everything is done automatically. The total rayon production for the last year amounted to a hundred and eighty-five million dollars.

Erect Big Flour Mill

Spillers Overseas, Limited, Will Have Large Plant At Calgary

It is stated that plans of Spillers Overseas, Limited, for the completion of their big mill at Calgary, are so far advanced that the contracts have been let to an English company for the equipment. The foundations and about two storeys have been finished and eight more storeys are to be built. The project, which has been approved by the government, will represent an outlay of \$4,000,000 to \$5,000,000.

L. J. Coburn, Milwaukee, Wis., is the inventor of a device to keep a motor's hands warm in cold weather. The heater is in the steering post and wheel and comes from the exhaust pipe.

Clemenceau Shuns Publicity. M. Clemenceau, former premier of France, has made arrangements so that France will not be known of his death until he has been buried a fortnight.

SUNDAY SCHOOL LESSON

JUNE 27

REVIEW: WHAT WE HAVE LEARNED FROM THE BOOK OF GENESIS

Golden Text: We know that to them that Love God all things work together for good, even to them that are called according to his purpose. Roman 8:28.

Devotional Reading: Hebrews 11:1-2.

Rev. W. H. Bennett, in his introduction to the Book of Genesis in The New Century Bible, gives the following excellent survey of the permanent messages of Genesis:

"The Patriarchs appeal to us, interested and helped us, because they are types of classes of men; their adventures were not unfamiliar experiences in the ancient east, and they are carried on vivid pictures and symbols of trials in human life. These have been—and are still—many Abrahams who have gone out, not knowing whether they went, in obedience to some divine call of conscience, to some prospect of spiritual advantage, rightly interpreted as the call of God, many Jacobes, who have, so to speak, stumbled into the Divine Presence, when their only hope was of heading off from the consequences of weakness, folly and sin; many Josephs, too, who have found in humiliating ruin the appointed pathway to honorable service. Such vicissitudes of fortune or of conduct are not infrequently met with in the lives of all men, and they are all encouraged by the possibility of grace suggested by these ancient stories. It is the message, the representative character of these narratives which have been preserved, and procured for them a place in Scripture. It is the message that they expressed real experience, and therefore handed them on as their own testimony also to the righteousness and love of God."

More Preventable Than Curable

Some Conditions People Should Watch For To Prevent Cancer

The tendency among cancer investigators, said Dr. George A. Soper, managing director of the American Society for the Control of Cancer, is to believe that the disease is more often preventable than curable. More accurate knowledge of the nature of the disease is accredited as one of the most outstanding advances in cancer research.

"One should beware," he added, "of the broken tooth or dental plate which continually irritates the gums, cheek or tongue, of the spectacles which make the head sore behind the ear, on the temples or nose; of any sore which changes in color, size or shape; of indigestion which will not stop and which is attended by any unusual and unnatural discharge from any part of the body and of any lump which does not go away."

"When any one of these conditions occur, you should go at once to a capable doctor and do what he advises."—New Report from Atlantic City.

Lost In The Jungle

Explorer Returns From Expedition to the Amazon After Many Adventures

Dr. W. J. MeGovern, the explorer, has just returned from an expedition to the Amazon and Andes. For many months he has been missing, and his fate was a matter of much speculation. He was killed. He was indeed lost for some time in the jungle and twice was attacked by hostile Indian tribes, but won his way through, after making remarkable discoveries. One of MeGovern's companions was drowned in a whirlpool, and the explorer himself was at death's door for some weeks with a strange jungle malady. The whole party was greatly troubled by vampire bats and other poisonous animals and insects.

Fire Brick Clay

Important Discovery Is Made At Williams Lake, B.C.

Development is expected to follow the discovery that the shale at Williams Lake, B.C. Already several shipments have been sent to Vancouver for tests and have been found to be comparable with the best clay in the market. The clay will withstand 3,500 degrees of heat and is highly acid-resistant. At the present time there are more than fifty industries in this province using British Columbia fire clays for furnace linings, and the discovery may also affect the manufacture of crucibles, insulating materials and pottery.

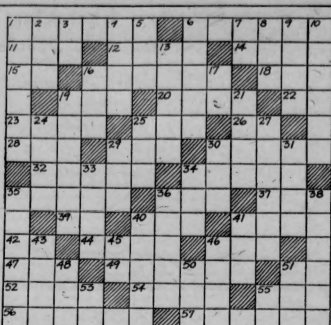

Develop Platinum Claims

Plans for the development of platinum claims on the northern border of Alberta involve the use of aeroplanes. The aeroplanes are already ready in Edmonton and are being put into shape by those interested in the development of these claims.

Wife (seriously).—"You've broken the promise you made me."

Husband.—"Never mind, my dear, don't cry. I'll make you another."

Chinese Praise Work

Of Lord Willingdon

Has Done Much To Cement Friendship With British Says Government Official

Unfaint praise for Lord Willingdon as chairman of the recent Boxer Indemnity Commission to China was voiced at Vancouver by C. Wang, a high official of the Chinese Government, who arrived on the Empress of Russia.

Mr. Wang was enroute to London for a conference with the Chinese legation.

"While it is true to say," said Mr. Wang, "that political disturbances are still disrupting China, it is equally true that Lord Willingdon has done more than any other man in recent years in China to cement the old friendship between that country and Great Britain. From the start of his work on the commission the Chinese people implicitly trusted his lordship. They recognized him as a democrat, a man of great breadth of mind and a gentleman of culture. Such a combination undoubtedly appealed to the people of China, a country with more than 2,000 years of civilization behind it. You in Canada are indeed fortunate to have him as your next governor-general," concluded Mr. Wang.

To Show Surplus

Manitoba Government Will Have Balance on Right Side of Ledger

A surplus approximating \$250,000 will be shown by the Manitoba Government for the fiscal year which ended April 30 last, according to reports obtained in government circles.

In his estimate, Premier Bracken, as provincial treasurer, anticipated a deficit of about \$145,000.

The fact that the balance is attributed to under-expenditure for certain appropriations and to unexpected returns from certain sources of revenue.

Bankers Go To Jasper

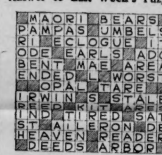

For the first time the annual convention of the Investment Bankers' Association is being held west of the Rockies.

When members of this association will gather at Jasper Park Lodge for their yearly conference. Following this, the convention party will proceed over Canadian National lines to Vancouver, where they will be entertained by the British Columbia section of the organization.

Honesty Or Good Luck?

Honesty, or at least good luck, pre-empted the Waldorf-Astoria, New York. For one hour, with scores of persons passing a folded wall of bank notes, the Waldorf-Astoria, New York, the door of the lobby, unguarded and unclaimed. F. H. Maguire, racing man, dropped the roll while on his way to lunch in the men's cafe. The money was in two \$1,000 and six \$100 bills.

Answer to Last Week's Puzzle

Sounds Note Of Warning

Britain Looms Supremacy On Seas Says Canadian Navy League

President

Sau Harris, president of the Navy League of Canada, after speaking of the Battle of Jutland, a contest on which depended whether the British Empire should continue or should go into the discard, sounded a note of warning. He took as his authority a British blue-book to show that Britain no longer was the premier sea-power of the world.

"According to records of the British Government," he said, "the 3,000 vessels which Britain had during the war have come down to 144, with 35 in process of building. The British fleet has 18 per cent. less vessels than our friends to the south. Japan is 175 per cent. weaker than the United States. I haven't said that Britain does not rule the waves. That test has not been made. God grant that it never shall be made. God grant that if it is made, Britain may yet be supreme on the seas."

"What is the situation in Canada? When we are not doing anything. Can Britain lose her premier position. If she does, the empire goes to pieces. It begins with the navy, and rose with the navy."

"When Canada took her place in the British Government," he continued, "she would be doing what it was her duty to do.—Report of Meeting in Toronto.

Is A True Britisher

Unknown Man Does His Share In Reducing British Debt To U. S.

A man born in England but who has lived in the United States fifty years, has sent his third contribution in three years to the British Government to be used toward paying the British debt to the United States. Winston Churchill, chancellor of the exchequer, has sent him the thanks of the British Government. His contribution this time consisted of bonds worth \$1,370.

A machine has been invented with which a piece of cheese measuring one inch square can be cut in 12,000 slices.

The worst alcohol among shags is that their prices are fearfully modern

WHEN you open an account in the Bank of Toronto you are not only assured of absolute safety for your savings, but in addition, all the conveniences of modern banking.

Drafts and Money Orders payable anywhere at lowest rates.

Travel Funds, identification provided for, which can be cashed throughout the world.

Safety Deposit Boxes for the care of bonds and all valuable papers, at very moderate rates.

Loans available, when conditions warrant, at fair rates of interest.

Carry your account where you obtain every banking service.

THE BANK OF TORONTO

OYEN BRANCH
H. R. Chapin, Manager

VOTE "1" FOR PROUDFOOT

In voting for a candidate an elector should exercise the same care as he would if engaging a manager for his business.

The main question should be "What are his qualifications and his record?" You judge a prospective employee, not on what he promises to do, but what he has done.

The Liberals have a record of sixteen years of office in this Province. This record they do not and cannot defend. The public, however, has not forgotten it. The Conservatives have no record at all. Their return, as that of the Liberals, would mean a return to the party system and all that it implies.

The U. F. A. ask for your vote on June 28 on their record for the past five years. They offer a continuation of sound business administration for the benefit of the people of Alberta as a whole, and not, as in the party system, for the benefit of party friends.

The only argument Liberals and Conservatives offer is that of promises. The Government's argument is performance.

During the past five years the cost of administration has been reduced 14 per cent, the Civil Service has been transferred from a basis of patronage to a basis of merit, a real highway policy has been put into effect, health and education services have been increased, etc. Efficiency is much greater in every department of government as a result of transference from a basis of party favoritism to one of business administration.

About Town and Country

Chas. P. Snyder and John Naismith motored to Calgary on business, last Wednesday and returned Sunday.

Owing to sickness in his family, Mr. O. M. Olson will dispose of his property at a public auction sale on Friday, June 25. Sale will take place on Section 32, Twp. 29, Rge. 4, 11 miles north and 2 miles west of Oyen, commencing at 1 o'clock sharp. This is a house fire sale, everything will be sold without reserve. B. H. Dial, is the auctioneer.

Miss Carman McDonald, who has been attending the Garbutt College in Calgary and has just finished her term there, returned to Oyen last Saturday.

Citizens of Oyen and district announced that arrangements have been made to use the ground floor of the Masonic Hall, Oyen, to receive election returns on Monday night (June 28). A special wire is being installed and returns will be posted as they come in after 8 p.m. Everyone is invited.

Will the party who borrowed my pole climbers, please return same at once. I need them urgently. Art. Wade.

Mr. J. D. Christie and wife and two daughters, who are motoring from Saskatoon to the coast, were the guests of Mr. and Mrs. J. W. Robinson during the fore part of the present week. Mr. Christie, who is a retired Saskatchewan farmer, retired crops on route, looking fine. The party is accompanied by Mr. Hopkins of Saskatoon.

CARD OF THANKS

We take this opportunity to express our sincere thanks to all our friends and neighbors for their great kindness and valuable assistance rendered to us in the loss of our home.

Office opposite Church of England

The fifth annual picnic of the Fairview District Association will be held at Fairview on Wednesday, July 14.

On Monday, Chas. P. Snyder, local Ford dealer, announced the new prices on all Ford models. "Chas" says: "They ought to go like hot peanuts", but he did not explain to us whether he was referring to the car's mechanical possibilities or his ability as a salesman.

LANFNE LOCALS

Don't forget the Lanfne and Excel community sports at Lanfne on July 1. Baseball and all kinds of races. Big dance at night with X. L. Orchestra (5 piece) in attendance.

Mr. B. F. Dell returned to the district yesterday and is going to move his household effects to Calgary, where he has purchased a home. His many friends are sorry to lose him from this community.

The Lanfne W. L. will hold their next meeting at the home of Mrs. J. S. McKenzie on Thursday, July 8 (instead of July 1) their regular meeting day at 2 p.m.

The ladies of Lanfne district met at the home of Mrs. E. S. Parker on Wednesday afternoon last week to show their sympathy by giving a miscellaneous shower of linen, cutlery, dishes, cooking utensils etc. Mrs. McQuirry, representing the Springburn W. I. presented Mr. and Mrs. Parker with a gift and expressed the sentiments of the ladies present in regards to the recent loss of their home by Mrs. Parker. Mrs. McQuirry showed her appreciation in a few well chosen words. After the function refreshments were served outdoors in a beautiful grove of trees. Twenty-six ladies being present.

Olson's sale, Friday, June 25. There are many articles not listed on the bills. Be at Section 32, Twp. 29, Rge. 4, when the sale commences at 1 p.m.

LEGAL NOTICES

Conservative Platform

"The provincial Conservative party stands for the following:

1. A complete reversal of the present Liberal and the present government's attitude toward equality by encouraging in every possible way those who use money to live in the exploration and utilization of our natural resources of all kinds.
2. A provincial immigration and colonization policy to supplement the efforts of the Dominion government to get people and to retain them when we get them here, so that with a more people amongst whom to distribute the load, we may hope to cope with our debt and our ever-increasing burden of taxation. The provincial Conservative party is determined to bring about an influx of capital and of people, because the future prosperity of our people is inseparably associated with these.
3. One system of voting for both city and rural constituencies.
4. An immediate decision as to the Spray Lakes water power project.
5. More local autonomy in municipal affairs.

Money for Roads

"A fair proportion of the money (raised by Provincial Conservatism Association).

Municipal District of Cereal No. 242

NOTICE OF IMPOUNDMENT

CONSERVATIVE PRINCIPLES ARE RESTATED BY THE CONSERVATIVE LEADER

A. A. McGillivray Sets Forth in Plain Language What the Provincial Conservative Party Stands for in Coming General Election

Co-operative Marketing Extension is Advocated

Proportion of Money Expended on Roads to Go Toward the Maintenance of Country Roads as Well as Main Highways—Encourage the Inflow of Capital and Immigration to Supplement Efforts of the Dominion Government

SPEAKING at Rockyford on Thursday afternoon, June 18th, in support of Hugh Miller, Conservative candidate in the Glenelg riding, A. A. McGillivray, leader of the provincial Conservative party, reiterated the policy of the party that he has stated from different platforms in Alberta since being elected leader in August, 1923.

"In his usual fighting style, Mr. McGillivray reviewed the record of the Liberal administration and the record of the present government. Summing up, he stated that the record of the Liberal government was following the declaration of political principles, the Liberal party cannot go back into power and its record cannot be hidden under the cloak of one new convert.

Give Them Chance

"The present government has failed to cope with public questions, the chief of which are redistribution, Southern railways, natural resources and the finance problem that it has failed to solve.

"The Lanfne W. L. will hold their next meeting at the home of Mrs. J. S. McKenzie on Thursday, July 8 (instead of July 1) their regular meeting day at 2 p.m.

"In so far as it lies within the control of the province, the Conservative party will keep the roads in good condition, keeping check over rural elevators and the grading of grain. "A real soil survey of the drought areas of the south, by the greatest agriculturalists available. "Put our provincial telephone system on a business basis. "Give every practical scheme a trial, providing for rural credit. "Equality of men and women. "A recognition of the fact that there is no such thing as a free lunch. The product of modern economic life as the large corporations and that they tend to bring about inequality in wages bargaining that would not exist if the individual had to bargain with the great corporations.

Right of Appeal

"Providing a right of appeal under the Workmen's Compensation Act to the provincial compensation board.

"Raising the scale of compensation for railways in non-emergency cases to the level enjoyed by other classes of workers.

"Equitable distribution of the burden of taxation for upkeep of the roads.

"A most careful consideration of all possible ways and means for providing security of tenure and a practical plan for the future of the school system for teachers.

"An examination of the school system to determine whether a new view to management is needed in the school body is not faced with an over-burdened curriculum.

"Revaluation and sale on the former railways of the C.P. and C.N. Canada railways, with a consequent saving of nearly one million dollars a year.

"The obtaining of our natural resources on fair and equitable terms without any school question or other political question essential services, the Conservative party took the position, as it does, that the budget could be so balanced in each year.

Revaluing the Budget

"The yearly balancing of the budget. In September, 1925, while advocates of this government were still saying that it could not be done without any school question or other political question essential services, the Conservative party took the position, as it does, that the budget could be so balanced in each year.

"A complete reversal of the former Liberal and the present government's attitude toward equality by encouraging in every possible way those who use money to live in the exploration and utilization of our natural resources of all kinds.

"A provincial immigration and colonization policy to supplement the efforts of the Dominion government to get people and to retain them when we get them here, so that with a more people amongst whom to distribute the load, we may hope to cope with our debt and our ever-increasing burden of taxation. The provincial Conservative party is determined to bring about an influx of capital and of people, because the future prosperity of our people is inseparably associated with these.

"One system of voting for both city and rural constituencies.

"An immediate decision as to the Spray Lakes water power project.

"More local autonomy in municipal affairs.

"A fair proportion of the money (raised by Provincial Conservatism Association).

Money for Roads

"A fair proportion of the money (raised by Provincial Conservatism Association).
